

Tips for having Great Skin before your Photography Session

- Start 2 weeks before your scheduled appointment: Cleansing, Exfoliating, Toning, and Moisturizing. Do this every day, in the morning and at night to your face and neck.

- Purchase a thicker formulated foundation, rather than a typical sheer and a concealer 2 shades lighter than foundation.

- Day of scheduled appointment:
 - Cleanse, exfoliate, tone, and moisturize face and neck.
 - If you have puffy eyes, use preparation H. This will help with puffiness reduction.
 - If you have any blemishes or red splotches, cover with the concealer before applying foundation.
 - Apply your make from the chin to the neck, so they are the same colour.
 - For a sculpted look, contour your eyes and cheeks.
 - For contouring your cheeks, just use 2 or 3 shades darker than your skin tone.
 - For contouring your eyes, highlight the brow bone by using a shadow that is light. But you want to stay away from eye shadows that are too frosty or shimmery, you don't want to be shiny in your pictures.

- When applying your eye liner, be very precise.
- Use waterproof mascara.
- Have your lip stick and lip liner a shade darker than your natural lip color.
- To create a Matte finish in your photos, please be sure to bring powder. But just in case of make up disaster, bring your entire make up including different eye shadows to change up your look with different outfits.
- **REMEMBER:** overall make up needs to be precise, more than everyday make-up.
